

12 month Fellowship Shoulder and Elbow Surgery

12 month Fellowship in Shoulder and Elbow Surgery working with Mr Lars Neumann, City Hospital Campus, Nottingham University Hospitals NHS Trust, United Kingdom

This fellowship, which is co-sponsored by Synthes, is an exciting opportunity to work in a busy Unit Specialised exclusively in Shoulder and Elbow surgery of a University Hospital with an international reputation. The Fellow will have the opportunity, either as assistant or surgeon, to participate in over 200 open procedures including primary and revision joint replacements (the total number of elective cases performed by Mr Neumann in 2009 was more than 700 including arthroscopic interventions). Because of the diversity of the case mix, the training program can be adapted to the individual needs and interests of the Fellow. Additionally, the large database and high patient flow will offer great opportunities to carry out research. The successful applicant should have completed his/her general orthopaedic training, wanting to develop a subspecialist expertise in Shoulder and Elbow surgery.

Further details of the Fellowship, salary, timetable and a copy of the 2008 and 2009 Fellow's report with a list of procedures performed, together with the contact details of previous Fellows are available on request.

Applications are currently being accepted for the **2010/2011 post starting on 31st August 2010, for one year.**

Enquiries and application, with a full CV, operation list and names of three referees to:

Mr Lars Neumann, FRCS(Ed)

Consultant Orthopaedic Surgeon
